Mert Can Ugurlu

Erzincan, Turkey | mert@canugurlu.dev | 0530 905 00 51 | canugurlu.dev

Education

Erzincan Binali Yildirim University, AS in Computer Programming – Erzincan, TR   2023 – 2025

Experience

Summer Intern, Zinde Information Technologies Ltd. Co. – Erzincan, TR   June 2025 – July 2025
After my associate degree, I did my compulsory internship in this company.
• Helped to program the automation robots in the industrial workshop.
• The web software of a device that can be used in restaurants and similar businesses has been developed as a full stack.

Call Center Assistant, Republic of Turkey Ministry of Health – Erzincan, TR   Feb 2018 – May 2018
I received the first call in the establishment of this call center.
• Worked for MHRS (ALO 182), which is affiliated to the Republic of Turkey Ministry of Health.

Projects

Official Bank Account Management Panel   2023
Reverse-engineered a real, licensed bank's proprietary mobile/web API to build a unified management panel. Users can add multiple accounts from the same bank, view balances, transaction history, and perform basic operations all through a single Laravel-powered interface, deployed via Forge.
• The official bank Android app reverse engineered.
• The API flows for banking transactions such as account login, money transfers, card transactions, and similar banking transactions within the banking application were reversed.

Trendyol Panel   2024
Panel software developed using .NET, running on the Trendyol Turkey website, and providing algorithmic activity to stores.
• The Trendyol Android app was reverse engineered.
• All mobile API flows for the relevant marketplace application have been resolved.

MarktSPY   2024
A web scraping service for a website that analyzes store products by pulling them from specific e-commerce marketplaces: Trendyol DE, Zalando, Douglas, Amazon DE
• The web scraping service was written in NodeJS as a monorepo.
